<b>Next Five Days Weather Forecast Summary</b>	According to weather forecast given by India Meteorological Department, Regional Meteorological Center, Mumbai, Possibility of Weather may dry during next five days. Temperature may ranges maximum temperature 28 to 30 Degree Celsius & minimum temperature 12 to 15 Degree Celsius.	
<b>Extended Range Weather Forecast (ERFS)</b>	Possibility of Maximum temperature may Below normal & Minimum temperature may Normal between 25 <sup>th</sup> to 31 <sup>st</sup> December 2024 over Madhya Maharashtra.	
<b>Crop</b>	<b>Stage</b>	<b>Agromet Advisory</b>
<b>General Advisory</b>	Use Meghdoot mobile app weather forecast based crop specific agromet advisories	
<b>SMS Advisory</b>	Carry out intercultural operation for soil moisture conservation and weed management.	
<b>Cotton</b>	<b>Picking</b>	Carry out picking of cotton and stored in a clean & dry place. Don't take ratoon crop of cotton which helps in reducing pink bollworm infection in next season.
<b>Wheat</b>	<b>Sowing To Seedling</b>	Keep field weed free for better growth & development. Carry out intercultural operations for soil moisture conservation.
<b>Chickpea</b>	<b>Seedling</b>	Keep field weed free for better crop growth. The first hoeing should be done after 20 days after sowing and the second after one month for soil moisture conservation.
<b>Rabi Sorghum</b>	<b>Seedling</b>	In Rabi sorghum, for soil moisture conservation first hoeing should be done three weeks after sowing helps in weed control and addition of soil to the crop.
<b>Pigeon Pea</b>	<b>Pod Development To Maturity</b>	Harvest timely sown mature pigeonpea crop. For control of Pod fly, Pod borer and plume moth, spray Emamectin benzoate (5% SG) 0.3 ml per liter of water or Indoxicarb (14.5 SC) 0.7 ml per liter of water.
<b>Papaya</b>	<b>Fruit Development</b>	During winter, Schedule irrigation at interval of 10 days as per requirement by double ring method, sprinkler or drip irrigation.
<b>Banana</b>	<b>Fruit Development</b>	Give irrigation to crop during night in winter. For protection from cold, cover the banana bunch with white plastic bag with 6% porosity.
<b>Animal Husbandry</b>	-	As temperature fall observed, farm livestock should be protected from exposure to cold particularly during night time to protect from pneumonia. Protect it from cold winds by hanging curtain from outside the shed.

# AGROMET ADVISORY BULLETIN
