**Agromet Advisory Based on Weather Forecast Prediction** 

Crop	Crop Stage	Advisory				
Weather Summary/ Alert		According to forecast given by Regional Meteorological Centre, Mumbai of				
		India Meteorological Department there is possibility of rainfall at isolated				
		places on dt. 16 <sup>th</sup> , 17 <sup>th</sup> , 18 <sup>th</sup> & 20 <sup>th</sup> April, 2024 and the weather may remain				
		dry on dt. 19 <sup>th</sup> April, 2024 in the district.				
		Warning: According to forecast given by Regional Meteorological Centre,				
		Mumbai of India Meteorological Department isolated places in the district				
		may experience thunderstorm activity accompanied with gusty winds (30 to				
		40 kmph), lightening and rainfall on dt. 16 <sup>th</sup> , 17 <sup>th</sup> & 18 <sup>th</sup> April, 2024 and				
		along with warm nights.				
Extended R	Range Forecast	As per ERFS products during 21st to 27th April, 2024 over Madhya				
(E	(RFS)	Maharashtra (Dhule, Nandurbar, Jalgaon, Nashik, Ahmednagar, Pune, Satara,				
		Sangli, Solapur, Kolhapur) division				
		Rainfall may remain above normal.				
		Maximum temperature may remain below normal.				
		Minimum temperature may remain normal.				
Genera	l Advisory	• As there is possibility of rainfall harvesting of matured crops should be				
		done. Store the harvested & threshed produce at safe storage places. If				
		threshing is not possible the harvested produce should be covered				
		properly.				
		• As there is possibility of rainfall at isolated places avoid water logging				
		condition and excess rainwater in the standing crop should be drained out				
		by providing drainage facility.				
		• For protection from untimely rains the stored grains should be shifted at				
		safe storage.				
		Spraying of insecticide and pesticide should be done by considering the				

		forecasted rain and preferably when there is no rain.
		Cattle should be kept at safe places in cattle shed.
		• Standing crops and fruit orchards should be given irrigation as per
		requirement and availability.
		• Farmers should observe the pest and disease incidence on their field and if
		the infestation is above economic threshold level (ETL) then proper pest
		and disease management should be done.
		• Farmers should download and make use of Meghdoot mobile app for
		weather based crop advisory and weather forecast.
		Also, farmers should download and make use of use of Damini mobile
		app for lightning and thunderstorm warning and forecasting.
Summer	Pegging to	Intercultural operation should be avoided after starting of peg formation. For
Groundnut	pod	control of sap sucking pests spray the crop with methyl dimeton 25 EC 10 ml
	development	per 10 liters of water. Due to cloudy weather condition for control of tikka
	stage	disease spray the crop with Mancozeb 2.5 gram or Carbendezium 1 gram
		mixed in 1 liter of water.
Onion	Harvesting	As there is possibility of rainfall harvesting of matured crops should be done
	stage	earliest. After harvesting of onion keep them for drying along with leaves for
		3-4 days in the field. For this keep the uprooted onions in rows by covering
		half of them by leaves. After drying cut the leaves by 4 cm apart from onion.
		The harvested produce should be covered properly and stored at safe storage
	Post	places as there is possibility of rainfall.  For control of white grub deep ploughing should be carried out in the field
