Agromet Advisory Based on Weather Forecast Prediction

| Crop | Crop Stage | Advisory | | | | |
|------------------------|---------------------------------|--|--|--|--|--|
| Weather Summary/ Alert | | According to forecast given by India Meteorological Department due to cyclone formed in east central Arabian Sea there is possibility of rainfall at most places on 02 nd and 03 rd June, on 04 th June many places may receive rainfall and on 05 th and 06 th June few may receive rainfall in the district. Warning : Isolated places in the district may experience thunderstorm accompanied with lightening and gusty winds (speed reaching 40-50 kmph) on 2 nd June 2020, on 03 rd June many places may receive heavy to very heavy rainfall and isolated places may experience extremely heavy rainfall, on 04 th June isolated places may receive heavy rainfall in the district. | | | | |
| General Advisory | | Isolated places may receive nearly raman in the district. Isolated places in the district may receive rainfall hence the harvested produce should be covered in proper way so that the rains may not damage the produce. The cattle's and animals should be kept at safe place. Matured fruits and vegetables should be harvested as early as possible. Harvested farm produce should be kept at safe storage places. The spraying of pesticide, insecticide should be done considering the forecasted rain. Purchase seed for cultivation of kharif crops from Agricultural University or nearest government authorized centres. | | | | |
| Cotton | P reparatory preparation | As a precautionary measure for effective control of pink bollworm collect and destroy all the trash, debris etc. of previous crop by burning which will help in elimination of the dormant pest and diseases. Sowing should be done at proper time, at proper depth and spacing. | | | | |
| Groundnut | Harvesting and storage | Harvesting should be done at proper maturity of crop. The harvested produce should be kept at safe storage place. | | | | |

| | stage | | | | |
|----------|---|---|--|--|--|
| Mango | Fruit Maturity | Due to present weather condition for control of fruit fly use methylusenol | | | |
| _ | to harvesting | coated 8-10 traps per acre. Harvest the matured fruits preferably before | | | |
| | stage | 10AM or after 4PM and store them at safe place for ripening. The | | | |
| | | transportation of produce should be done in evening or after. | | | |
| Banana | | As per requirement give support of bamboo sticks or polypropelene sticks to | | | |
| | | the plants and banana bunch which is big. The suckers at the base of banana | | | |
| | | trunk should be cut and destroyed at regular intervals also the dried and | | | |
| | | infected leaves should be cut and destroyed to keep the orchard clean. | | | |
| Okra and | Fruit maturity | For control of fruit borer gather all the infested fruits and burry them in soil. | | | |
| tomato | | Take a spray of deltamethrine 2.8 EC, 8 ml or quinolphos 25% EC, 20 ml or | | | |
| | | lambda psyhalothrine 5% EC, 6 ml per 10 lit. of water. | | | |
| Citrus | | For control of sap sucking citrus psyla spray 10ml quinolphos 25% | | | |
| fruits | | concentration or 5.5ml novaluron 10% conc. Per 10 ltr of water. | | | |
| Animal | | It is most important to give wormicide medicine to animals by consulting | | | |
| Manageme | | veterinary doctor. Always give clean drinking water to animals. For control | | | |
| nt | | and prevention of diseases all animals should be given vaccine and medicine | | | |
| | | in consultation with veterinary doctor. | | | |
| Note: I | Note: Farmers should take necessary precautionary measures while spraying insecticide, fungicide etc. | | | | |
