

Preamble

The Department of Extension Education has its origin as Agricultural Extension Section at the College of Agriculture, Pune that was established in 1955. After establishment of Mahatma Phule Krishi Vidyapeeth (1968), Rahuri, the section of Agril. Extension, Pune, became a full-fledged Department of Extension Education at the Central Campus, Rahuri in 1972. This Department is mandated with Teaching, Research and Extension Education in the subject of Agricultural Extension, especially in the jurisdiction of Western Maharashtra (10 districts), through Colleges, Research Stations and NARPs.

The fundamentals associated with agricultural extension, communication and rural development are taught in the UG programme leading to B.Sc. (Hons.) degree in Agriculture. The students are well exposed to theoretical and practical aspects through the lectures and practical's with advanced state of art teaching aids.

The need based applied social research programmes are carried out through M.Sc. and Ph.D students project; ad-hoc and research Schemes. Since the inception of the department, the research work has been done on the areas viz. socio-economics of agriculture and rural life, adoption and diffusion of agricultural innovations, evaluation of agricultural production programmes, impact assessment of agricultural and allied programmes, impact of agricultural training on extension workers and farmers, economic viability of farming system, gender in agriculture and development.

In addition to this the Department is on forefront in university extension activities through its College Development Blocks. Method and result demonstrations, educational tours of Farmers and Farm Women, Farmers Rallies etc. extension activities are regularly organized through these blocks.

Faculty

Sr. No.	Name	Designation
1	Dr. M.C. Ahire	Head
2	Dr. G.K. Sasane	Professor
3	Dr. V.S. Shirke	Professor
4	Dr. V.J. Tarde	Associate Professor
5	Dr. S. B. Bhangre	Associate Professor
6	Dr. P.B. Kharde	Associate Professor

7	Prof.B.T.Kolgane	Associate Professor
8	Dr.S.S.Khandve	Associate Professor
9	Dr.K.V.Gurav	Associate Professor
10	Dr.J.H.Gaikwad	Associate Professor
11	Dr.H.P.Sonawane	Associate Professor
12	Dr. A.B. Gaikawad	Assistant Professor
13	Dr. S. D. Patil	Assistant Professor
14	Dr. A.M. Chavai	Assistant Professor
15	Dr. P. D. Suryavanshi	Assistant Professor
16	Dr. U.D. Jagdale	Assistant Professor
17	Dr. M. V. Ajotikar	Assistant Professor
18	Dr. D.N. Pharate	Assistant Professor
19	Dr. D.B. Suryavanshi	Assistant Professor
20	Prof. N.N. Tale	Assistant Professor
21	Dr. S.S. Sadaphal	Assistant Professor
22	Dr. B.D. Romade	Assistant Professor
23	Dr. M.B. Dhadwad	Assistant Professor

Academic Programmes

A) M.Sc.(Agricultural Extension)

Capacity of students: 15

Year of start: 1967

B) Ph.D (Agricultural Extension)

Capacity of students: 4

Year of start: 1979

Research Recommendations

1. There is visible socio-economic impact of pomegranate production technologies developed by MPKV, Rahuri on growers in Western Maharashtra. However, majority of pomegranate growers are facing the constraints like disease and infestation. Hence, for overcoming the constraints and sustainable development in socio-economic status, it is recommended that the department of Agriculture should create large scale awareness programmes by using mass media for plant protection measures and organizing training programmes for imparting skills through the university.(2012-13)
2. For increasing the adoption of the recommended banana production technologies such as use of bio-fertilizers, banana bunch management and plant protection measures, it is recommended to organize cluster demonstrations and group discussions by the Department of Agriculture in co-ordination with State Agricultural University. (2013-14)

3. A farmers knowledge and adoption of high iron content Bajara variety Dhanshakti (81 ppm) is low, it is recommended that the Bajara Research Scheme and Private Seed Company should jointly create awareness through use of media in public-private partnership mode. SHGs should make available products prepared from this variety in the market for anemic women and children. (2015-16)
4. Seed production programme of university released onion varieties is recommended to be undertaken in cluster of villages for increasing seed availability. Also, for increasing the adoption of seed treatments, fertilizer dose, drying and curing of onions and use of fungicides in onion storage structures, Agricultural University and State Agriculture Department should organize trainings, demonstrations and group discussions on large scale. (2015-16)
5. Enhancement of chickpea productivity by application of IPM technology and use of sprinkler for protected irrigation is necessary. It is recommended that the State Agricultural University and State Department of Agriculture should popularize these technologies through use of mass media and by organizing trainings and demonstrations as to increase its low knowledge and adoption. (2015-16)
6. University paddy recommended technology is cent percent adopted in College Development Block through Method demonstration, Result demonstrations and Group discussion. These extension methods should be replicated in other paddy growing areas for increasing adoption of recommended technology.(2017-18)
7. Considering the performance of Phule Samarth variety of onion in terms of per hectare production and net returns, It is recommended that, efforts may be made by the state Agriculture Department to popularize this variety among the farmers.(2018-19)
8. For improvement of **salt affected soil**, the extension agency should give special emphasis on increasing the adoption of green manuring crops viz; Shevari & Dhaincha”. (2007-2008)
9. It is recommended to recognize the **Jaggary producing units** as Small Scale Industry for the benefits like continuous electricity supply and provision of credit from formal financial institutions”. (2008-2009)
10. In order to provide technical knowledge to the drip users regarding use of proper method of **declogging of emitters** it is recommended to provide suitable training to Drip users. (2009-2010)

11. The **Rural Youth** are engaged in Agriculture and allied enterprises like dairy but they are not having enough knowledge and skill therefore it is recommended to impart in depth training to rural youths for developing Agricultural entrepreneurship by the state department of Agriculture in collaboration with Agricultural University . (2010-2011)

12. In spite of having good knowledge of fodder management there is low adoption therefore recommended to motivate the **goat keepers** by organizing demonstrations and exposure visits. (2011-2012)

13. Simplified document procedure of **NHM** proposals timely and adequate availability of quality grafts/ planting material with training on orchard management to beneficiaries for harnessing the production potential of National Horticulture Mission is recommended. (2011-2012)

14. There is visible socio-economic impact of pomegranate production technologies developed by MPKV, Rahuri on growers in Western Maharashtra. However, majority of pomegranate growers are facing the constraints like diseases and pest infestation.

Extension Activities

Organization of Workshop on e-Content Development on 1-2, August, 2018

Organization of Induction Training for Newly Recruited University Teachers on 1-2, November, 2018

Organization of Result Demonstrations on Paddy (Bhogavati) and Chickpean (Digvijay) under College Extension Block, Kolhapur

Distribution of Mineral Mixture and Pultry Birds under College Extension Block, Pune

Organization of Farmers Training and Group Discussion under College Extension Block, Pune
