Agromet Advisory Based on Weather Forecast

Naxt Five Days Weather Forecast Summary	According to weather forecast given by India Meteorological Department, Regional Meteorological Center, Mumbai, Possibility of light to moderate rainfall at Isolated Places during five days. Temperature may ranges maximum temperature 32 to 34 Degree Celsius & minimum temperature 23 to 24 Degree Celsius.	
Extended Range Weather Forecast (ERFS)	Possibility of Above normal rainfall, Maximum temperature may Below normal & Minimum temperature may Normal between 16 th to 22 nd October 2024 over Madhya Maharashtra.	
Crop	Stage	Agromet Advisory
General Advisory		Use Meghdoot mobile app weather forecast based agromet advisories and DAMINI mobile app for getting lightning alerts.
SMS Advisory		Carry out intercultural operation for soil moisture conservation and weed management.
Cotton	Boll Development	Due to continuous cloudy weather, excessive humidity and rains for internal boll rot disease management, Copper oxychloride (50 WP) 2.5 gm plus Streptomycin 0.2 g per liter mixed with water should be sprayed.
Rabi Sorghum	Sowing	Rabi sorghum sowing should be done till 15 th October. Spacing should be 45 x 15 cm. Use 10 kg seed/hectare. Seed treatment should be done @10 ml of Thiamethoxam (30 FS) per kg of seed before sowing to control the infestation of stem borer and shoot fly during seedlings. To prevent earhead disease seed treatment should be done @4 gm/kg of Sulfur. Then Acetobacter and Azotobacter 25 gm + PSB 25 gm/kg of seed.
Gram	Sowing	Sowing of rainfed gram should be done considering sufficient moisture in the soil. The crop requires medium to heavy (45 to 60 cm deep), well drained, loamy soil. Sowing depth is 10 cm and Spacing 30 cm x 10 cm.
Pigeon Pea	Flowering	Carry out intercultural operation for soil moisture conservation and weed management.
Maize	Maturity	Harvesting of maize done after the corn husk turns yellowish white. Then dry well in the sunlight so that during storage corns not damaged by insect pests. Then remove top cover of the husk and separate the grains from the husk with the help of maize sheller.
