		between 12 to 15°C.				
Extended Ran	ige Weather	Possibility of maximum temperature & minimum temperature may normal in between 8 th				
Forecast	(ERFS)	to 14 th February 2023 over Madhya Maharashtra.				
Crop	Stage	Agromet Advisory				
		Keep crop weed free by intercultural operations. Carry out plant protection measures to				
General A	dvisory	protect the crop from pest and diseases infestations on time. Farmers must use				
		MEGHDOOT mobile app for weather forecast and crop wise agromet advisories.				
SMS Ad	lvicory	Give irrigation to rabi crops at moisture sensitive crop growth stages. During Clear				
SMS Advisory		Weather spray should be done.				
Wheat	Tillering	Spray 19:19:19 soluble fertilizer @ 2% (200 gm in 10 liters of water) 55 to 70 days after				
	Stage	sowing. At the stage of grain filling, spray 2% urea (200 gm urea in 10 liters of water).				
	Pod filling Stage	Due to cloudy condition if infestation of Pod borer in gram crop observed, The first spray				
		should be applied at the time of early flowering stage. For this 25 kg neem powder should				
		be soaked in 50 liters of water overnight. In the morning remove the extract with the help				
Chickpea		of cloth and pour 450 liters of water in it. Spray this solution on 1 hectare area. After 10 to				
		15 days spray Heliokill 500 ml in 500 liters of water per hectare. Then take third spray of				
		Chlorantroniliprole 18.5% SC 100 ml per 500 liters of water if required during clear				
		weather condition.				
Rabi	Grain Filling	If infestation of fall armyworm observed, carry out dusting of Malathion 5 % D.P. at the				
Sorghum		rate of 20 kg per hectare.				
g	Sowing	Seed Treatment: Apply 5 gm of Thirum or 2 gm of Carbendazim or 3 gm of Mancozeb or				
Summer		5 gm of Trichoderma biological fungicides per kg of seeds before sowing to protect the				
Groundnut		crop from seed borne and seedling diseases. Then apply 25 gm of Rhizobium and 25 gm				
		of Phosphorus soluble bactericide per kg of seed. Dry the treated seeds in shade.				
C		Sowing time for crop is 20 th January to 10 th February. Select varieties like Vaibhav, P.K.V				
Summer	Soil Selection	AKM4, Utkarsha, B.M. 2002-1, B.M. 2003-2 for sowing. Spacing & Seed rate: Foe				
Greengram		sowing spacing should be 30×10 cm. Use 5 to 6 kg seed per acre. Seed treatment: crop is				

susceptible to root rot disease. To control the onset of the disease and for early
